

## 6 Stufen (nach Bloom)

**Diese Verben zeigen, wie gut du etwas verstehst ...**

The verbs in this chart correspond to the six levels in Bloom's taxonomy of thinking skills. The chart can be used to illustrate the level of complexity of a task that students are asked to complete. The students can see which verbs correspond to lower (surface) and higher order thinking skills (bottom of the ocean) and this will hopefully help them to demonstrate some of those higher order competencies when they are being assessed. Students can be asked to think of questions that could correspond to each level.

(Adapted from a resource from Patricia Herr (VSL). She laminated the chart as a bookmark for her VCE Spanish students.)
